

In Partnership
with Code.org®

In the STEM Lab at City Park, students are learning how to read and write code on a computer. This will be the fourth year that students have been learning computer coding, starting in kindergarten. All students in kindergarten through fifth grade will have a personal password and be able to work at their own pace from anywhere there is internet access. Students who were at City Park last year, will have the same picture password as before. New students will be given a password when they come to the STEM Lab, or a parent can email me and I can set one up for them.
